

# Brains4Drones®

we turn **toys** into **tools**®

Susan Rossbach, CEO susan@brains4drones.com 972-974-3476

## AI Tools for Inspections and Situational Awareness

At Brains4Drones, we build cutting-edge solutions for drones, vehicles and cameras.  
 We use AI to collect, enhance and curate high quality imagery.  
 We enable our clients to quickly assess asset condition and respond to outages.

Value Proposition	 <b>CERTIFIED DRONE PILOT</b>	Expertise
-------------------	--	-----------

- ✓ We rapidly prototype cutting-edge customized solutions that work in real time in the real world.
- ✓ We have worked extensively with both public and private sector clients.
- ✓ Your data is secure - no cloud required.

- ✓ Our CTO is a renowned Computer Vision Scientist with 25+ years in Robotics.
- ✓ All software and hardware development is done in-house in the US.
- ✓ Our licensed engineers and pilots hold paramount the safety of the public.

## Projects & Products

- ❑ \$1.1M DOE grant *Rapid Assessment of Distribution Line Damage via Autonomous UAV* for storm response.
- ❑ \$325K sole source DOE award to adapt our AI technology for wildfire mitigation.
- ❑ SeeMore: A tool-in-the-truck that displays curated inspection results on an AI-enabled laptop for vegetation management.

Founded in 2016, Brains4Drones is a Texas-based woman-owned business with 20+ employees.
