

Say goodbye to shot sheets!

With Gimbal+ as your videographer, your drone will detect the nearest pole top and safely perform a 360-degree inspection while you focus on your mission.

We're a woman-owned robotics company out of Plano, TX.
We've been putting AI on drones for utility asset management since 2017.
Our products make your drone ops safer, more efficient and more informative

Interested in a demo of a smarter drone-based inspection?
