

SeeMore

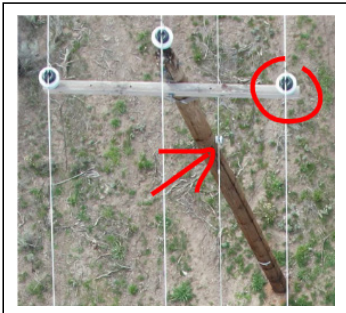

with Brains4Drones®

toy.

tool.

Review your drone footage from the comfort of your truck.

- BYOD (bring your own drone, any model)
- Rugged, hi-vis touchscreen laptop
- Safe, pre-planned drone missions
- Review, annotate and map in the field
- No connectivity required

SeeMore with AI-enhanced imagery.

- Geo-locates and overlays the poles
- Flags areas with potential vegetation encroachment
- Generates a real-time orthomap and height map
- Offers historical views
- Enables real-time decision making

We're a woman-owned robotics company out of Plano, TX.
We've been putting AI on drones for utility asset management since 2017.
Our products make your drone ops safer, more efficient and more informative.
