

Stop drowning in data!

With Shutter+ your drone will frame and photograph every distribution pole while you focus on your mission.

- Capture only the data you want
- Faster flights and processing times
- Automatically geolocate your poles
- Realtime results
- No connectivity required
- Your data stays on the drone

We're a woman-owned robotics company out of Plano, TX.
We've been putting AI on drones for utility asset management since 2017.
Our products make your drone ops safer, more efficient and more informative
